

# FUEL ANGEL™

## MISFUEL PREVENTION DEVICE

Replacing the existing fuel cap with the **Fuel Angel™** Misfuel Prevention Device prevents drivers from accidentally inserting a gasoline nozzle into the diesel vehicle's filler neck and dispensing the wrong product into the tank.

Your investment in this simple, inexpensive device will save thousands of dollars in repairs. Consider the costs to tow the vehicle, pump out contaminated fuel, replace engine components, along with the costs of vehicle downtime, lost revenue and rental charges.

Other Benefits:

**LIFETIME WARRANTY.**

If the **Fuel Angel™** ever wears out or breaks, we will replace it for no charge.

**EXCELLENT RETURN-ON-INVESTMENT.**

The modest price provides excellent insurance against potential fuel contamination and expensive engine repairs.

**QUICK & EASY INSTALLATION.**

It takes less than one minute to install no matter the level of mechanical aptitude.

**“Absolutely needed on all our Sprinter assets. This is a much needed wrong fuel prevention solution.”**

National Fleet Manager
