

# TOTE CABINETS

For your small fleet or temporary solution, Blue1 offers a quality line of tote cabinet solutions, specifically designed for the outdoor storage of 275/330 gallon DEF totes. Protect DEF from freezing temperatures as well as degradation from UV rays and excessive heat with these clean and reliable totes.

Blue1's pre-wired tote cabinet systems are certified per UL-508A and CSA C22.2 electrical standards and include an on/off switch, interior light and GFCI receptacle. The exterior is constructed of 100% composite material that will not rust or corrode. Sizes are available for both single and double tote storage. The narrow width allows convenient installation directly on the fuel island.

Both models can be crafted for you for either cold weather (insulated) or warm weather (non-insulated) sites.

## BLUE1's TOTE CABINETS INCLUDE: ..

- ◆ **NO FREEZING, NO DEGRADATION.** Cabinets protect pump assembly and tote from inclement weather
- ◆ **EASY REFILLING ACCESS TO BOTH LANES.** Centrally located weather-proof fold down dispense door on end of unit for easy vehicle re-filling access to both lanes
- ◆ **EASY ON/OFF LOADING & RELOCATON.** Heavy duty chassis with forklift-compatible slots
- ◆ **SECURITY & PEACE OF MIND.** Both dispense and large door are lockable to prevent potential fluid theft.

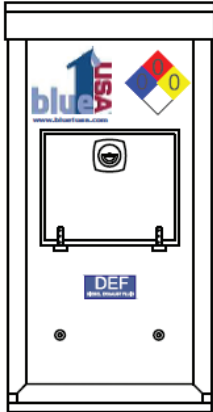

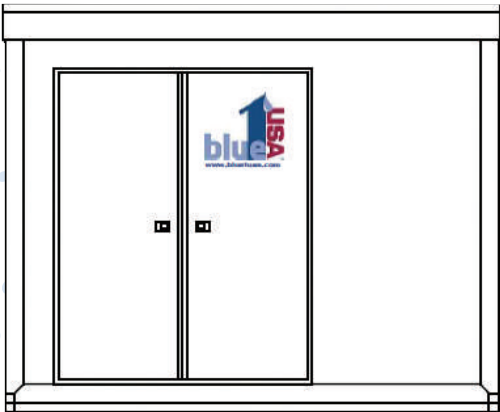

## AVAILABLE CUSTOM-CRAFTED SOLUTIONS:

- ◆ Insulated and non-insulated exterior housing
- ◆ Thermostatically controlled heater
- ◆ Built-in dispense door with hose, reel and pump assembly
