

ANNOUNCEMENT

Blue1USA and EZ Fuel Expand Product Line and Rebrand Company

Buford, GA. August 6, 2018. Blue1USA and EZ Fuel jointly announce the addition of EV charging and propane autogas equipment to their product line along with the launch of a new company trade name, ***Blue1 Energy Equipment***, updated logo, and new website. The addition of these clean energy products provide fleet owners with the ability to turn to one national source for all of their fleet fueling equipment needs.

The new name evolved from our nationally recognized ***Blue1USA*** name and reputation proudly earned with reliable, innovative, Diesel Exhaust Fluid (DEF) products since the industry was born in 2008. "***Energy Equipment***" is a result of our industry research and commitment of providing a full range of fleet infrastructure solutions that customers with diversified engine technologies will need.

Dave Polak, President and founder states, "We have recently partnered with the largest electric vehicle supply equipment (EVSE) company in the world, and the leading manufacturer of propane autogas dispensers in the United States. As our customer's fleet demographics evolve, we are now well positioned to support them with our expanded product line of clean energy equipment solutions well into the future."

The corporate structure, PureGreen Equipment Services, LLC, remains the same. For more information, please visit our new website, www.Blue1EnergyEquipment.com, or call (770) 688-1958.
