Not in the Budget (this year)

Blue1 Energy Equipment now offers an easy and affordable way to fund your fuel island or fueling equipment needs through its partner, National Cooperative Leasing (NCL).

NCL offers financing options specifically structured for municipalities. In fact NCL can finance the entire cost of your project from design to installation. Your purchase power can now increase by over four times. Only the annual lease payments need to be in the budget, not the total project cost.

Today, many communities are utilizing programs by NCL as an effective means to get the equipment they desperately need to keep their fleet productive. If you cannot budget for the equipment or the project that is required, you can easily finance all or part for only a percentage of the cost.

To learn more, contact your Blue1 Energy Equipment representative or visit Blue1EnergyEquipment.com or [National Cooperative Leasing.com](http://NationalCooperativeLeasing.com)
